PROJECT

Digital Loan Origination System

(DLOS)

EXECUTIVE SUMMARY

Budget
$4.2M

Impact
220 branches
1.4 million customers

Sponsor
CDO

OBJECTIVES

- Digitize end-to-end loan origination process
- Reduce Turnaround Time (TAT) from 14 days → 24 hrs
- Improve Customer Experience (CX) across channels

💡 Insight: Early stakeholder alignment was critical given 6+ systems integration and $4.2M budget sensitivity.

Loan Processing: Before vs Target Digital Transformation

A consulting-view comparison of manual inefficiency vs. intelligent automation

Current State (Manual Process)

Inefficient · Error-prone · Slow

1. **Customer Visits Branch**
   In-person only, no digital option
   Manual work
2. **Fills Paper Form**
   Handwritten, prone to errors
   High error risk
3. **Submits Documents**
   Physical copies, risk of loss
   High error risk
4. **Manual Data Entry × 3**
   3 separate systems, repeated entry
   Slow processing
5. **Wait 7–14 Days**
   No status updates for customer
   Slow processing

Processing Time		
7–14 Days	→	< 24 Hours
Before		After

Drop off Rate		
34%	→	10%
Before		After

TRANSFORMATION

Future State (Digital Process)

Automated · Accurate · Fast

1. **Online Application**
   Any device, anytime, anywhere
   Automated
2. **Auto Document Upload**
   OCR + cloud storage, instant
   Real-time
3. **API-Based Data Sync**
   One-click integration, zero re-entry
   Low error
4. **Instant Credit Check**
   AI scoring in seconds
   Real-time processing
5. **Decision in < 24 Hours**
   Automated approval, auto-notify
   Fast processing

System Touchpoints		
3 Systems	→	1 API Hub
Before		After

Annual Cost per Loan Processed		
$ 480	→	$ 120
Before		After

Stakeholder Power-Interest Matrix

Engagement Strategy by Influence & Interest Level

High

INFLUENCE →

Low

KEEP SATISFIED

Address Needs · Periodic Briefings

- **CFO** — Finance Head
- **External Auditor** — Compliance/Audit

MANAGE CLOSELY

High Engagement · Co-create

- **Sarah Mitchell** — CDO (Sponsor)
- **James Okafor** — Product Owner
- **Priya Sharma** — Project Manager
- **Head of Retail** — Business Head
- **IT Security** — Security
- **Legal & Compliance** — Risk

MONITOR

Low Effort · Track Passively

- **Fiserv** — Vendor

KEEP INFORMED

Regular Updates · Engage

- **Dev Team** — Engineering
- **QA Team** — Testing
- **Loan Officers** — End Users
- **End Customers** — Users

Manage Closely · Keep Informed · Keep Satisfied · Monitor

AS-IS Pain Points – Personal Loan Process

Operational Inefficiency

- Triple data entry across 3 systems
- 4+ hours per application
- No system integration

Process Delays

- Credit bureau request: 1–2 day delay
- No API integration
- Paper document collection: 3–7 day delay
- No digital upload
- Underwriting committee: 3–5 day delay
- Manual review
- Physical decision letters: 2–5 day delay
- No digital communication

Technology Gaps

- Legacy LOS system
- Session timeouts, data loss
- No integration between systems
- Rework required

Customer Experience Issues

- No application status visibility
- Officers spend 1 hr/day on calls
- No customer portal

TO-BE Capability Strengthening

⚙️ Operational Efficiency

Data entry → Automated system integration (LOS + CRM + Core)

Decisioning → Rules-based automated engine

😊 Customer Experience (Improved)

Application → Online responsive web form

Tracking → Real-time status portal

Communication → SMS/Email updates

Branch visits → Fully digital journey (no physical visits)

💻 Technology (No Gaps)

System integration → FiServ API integration

Document processing → OpenText OCR

Notifications → Twilio + SendGrid

Digital signing → DocuSign integration

⏱️ Process (No Delays)

Credit check → Instant API-based bureau pull

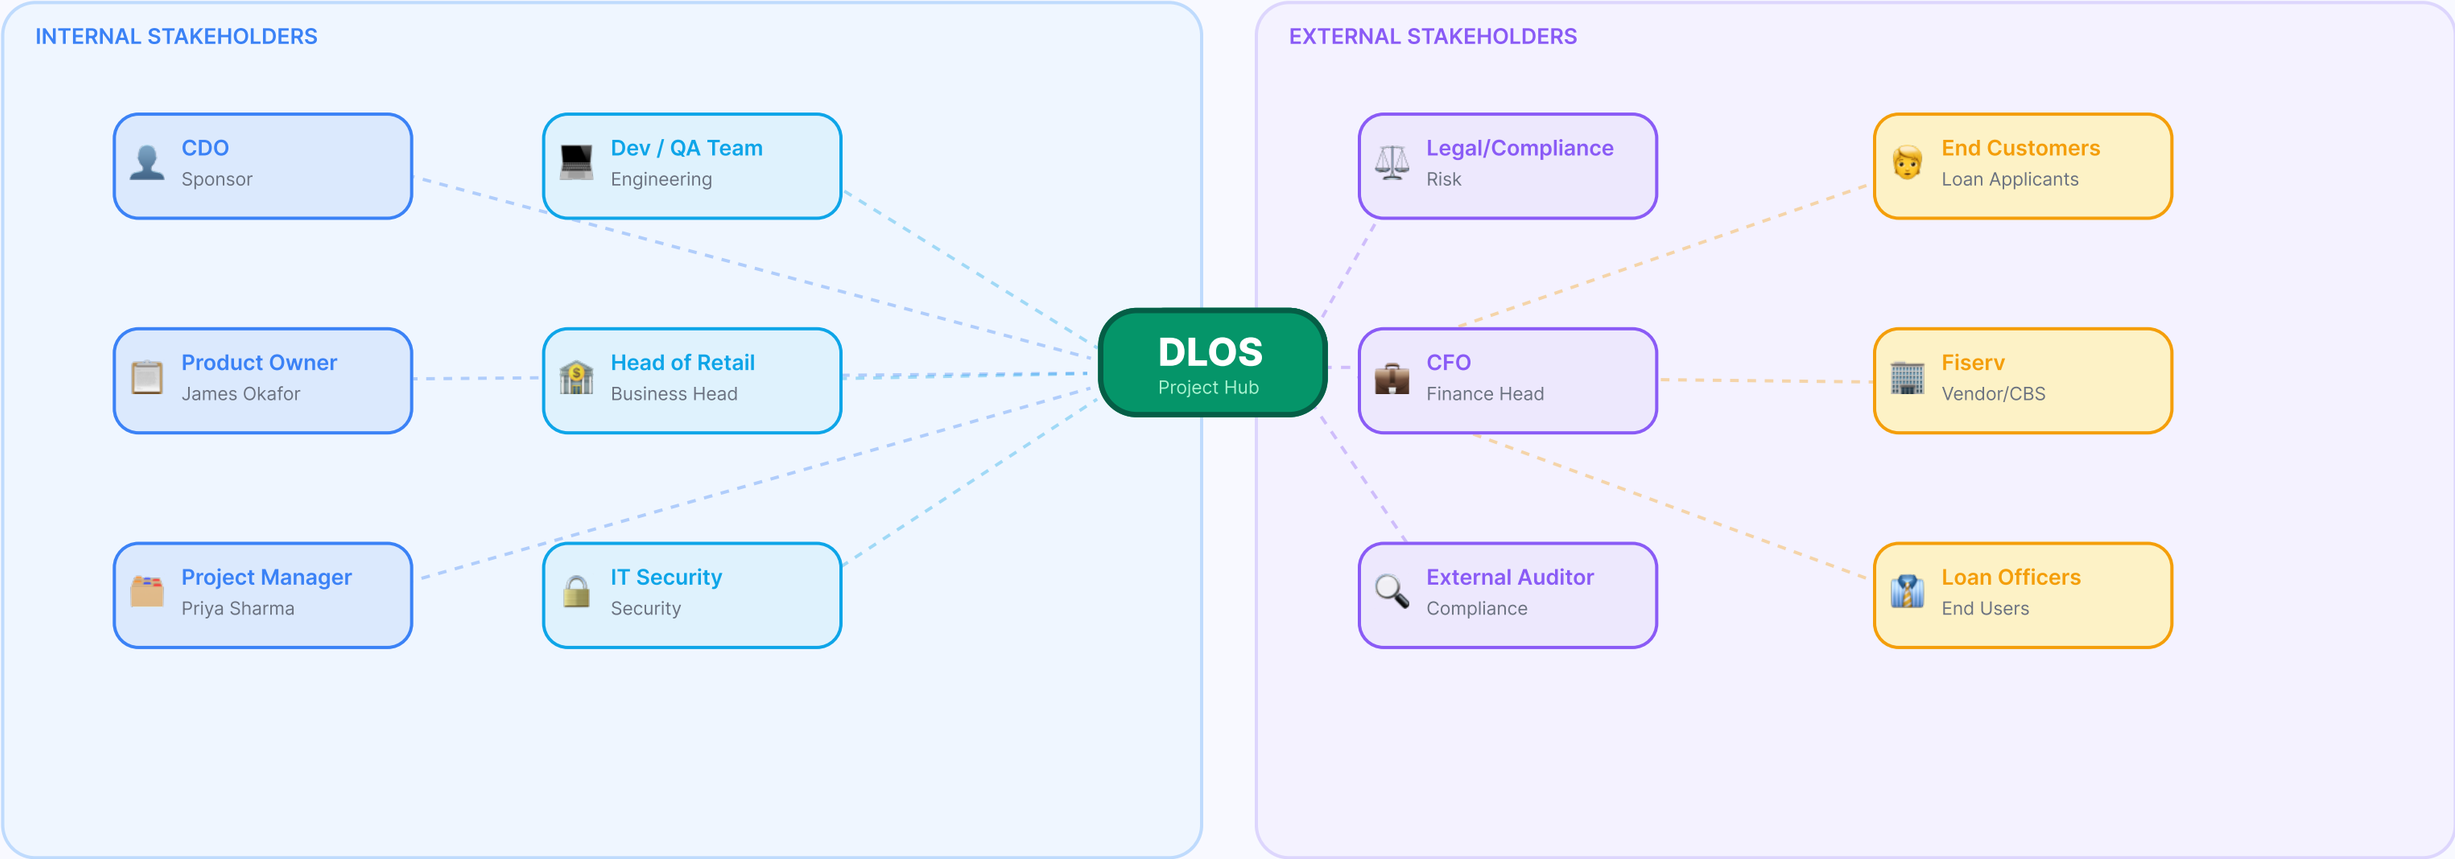
Document handling → Digital upload with OCR

Underwriting → Reduced via automation

Communication → Instant digital notifications

Stakeholder Context Cluster

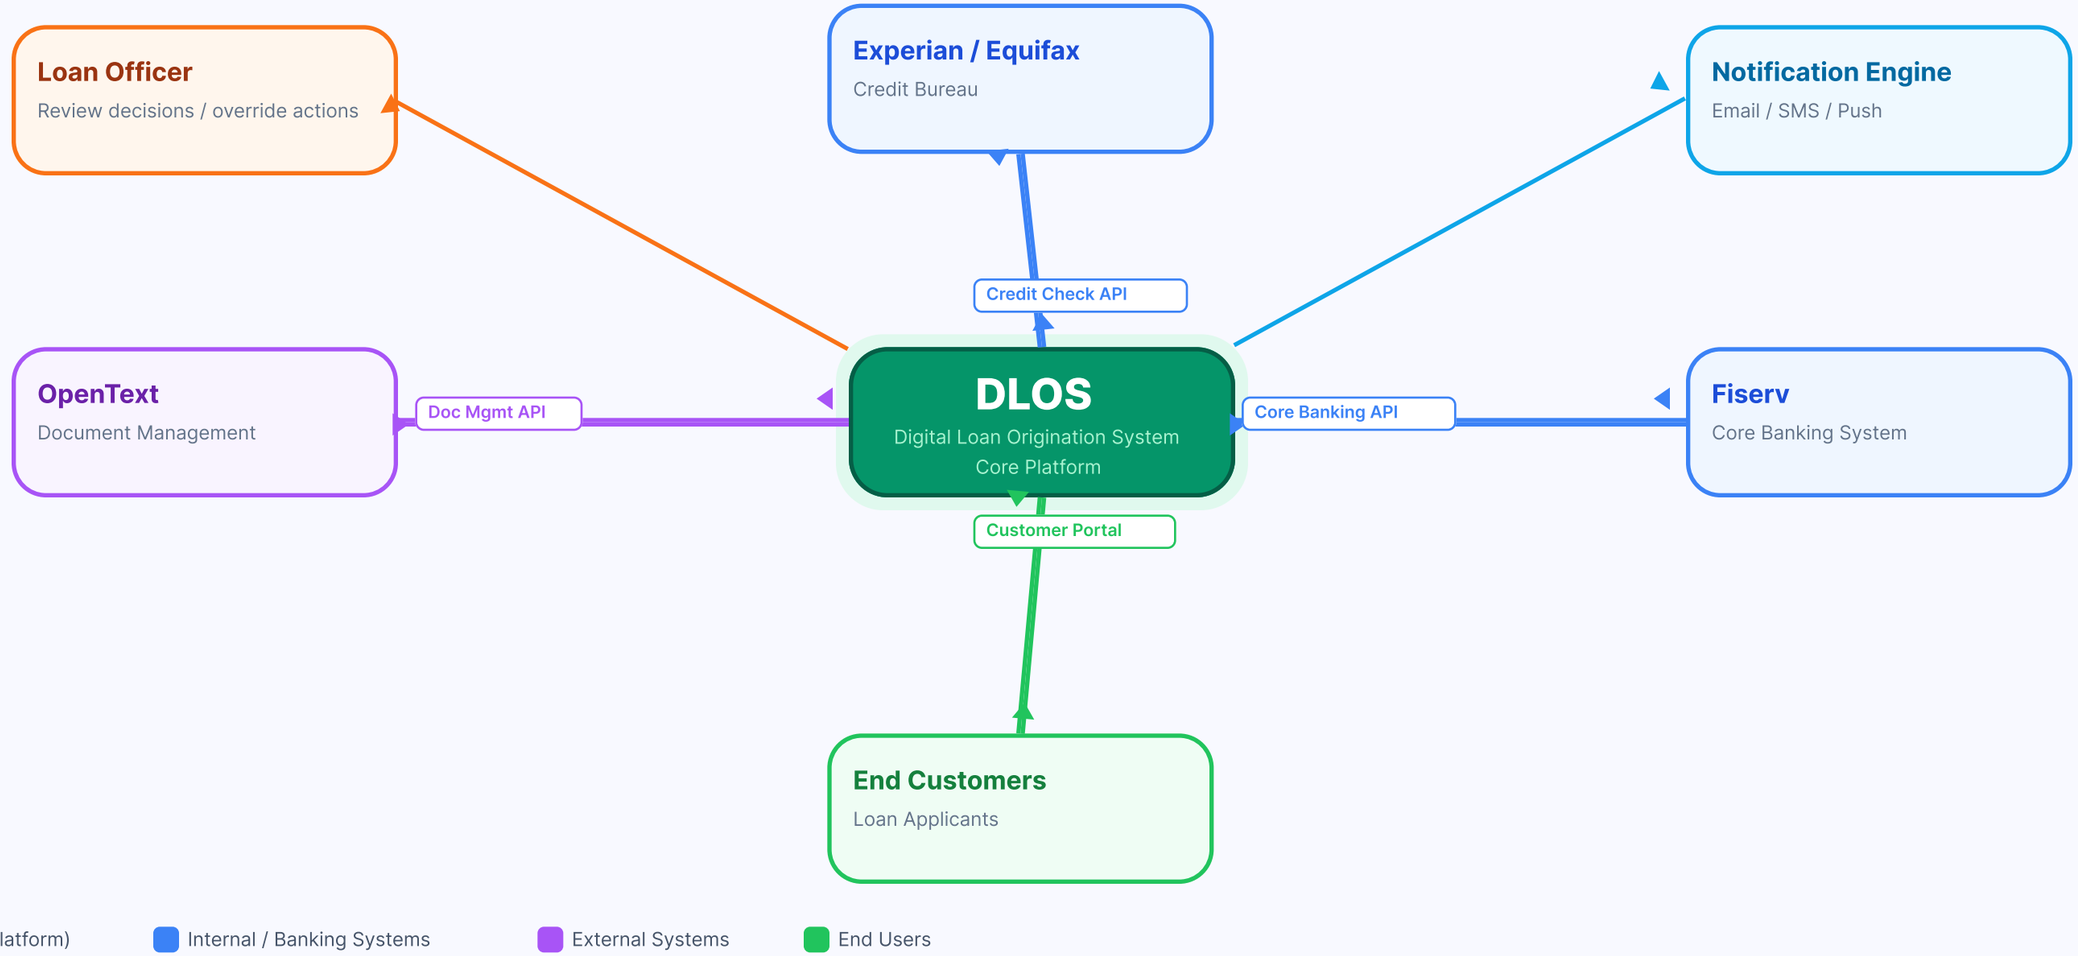
DLOS project — internal vs external



💡 Insight: 8 of 13 stakeholders require active management (Manage Closely), indicating a high-complexity engagement model for this project.

System Integration Architecture

DLOS — Integration Touchpoints



DLOS (Core Platform) · Internal / Banking Systems · External Systems · End Users

💡 Insight: Multiple external integrations increased dependency risk and required early stakeholder alignment with Fiserv, Experian/Equifax, and OpenText.

Prioritization Drivers

- Compliance
- Time to market
- Efficiency
- Customer experience

MUST HAVE

Document upload & OCR
No paperwork needed

Decisioning engine
Auto approve/decline

Loan officer dashboard
Used by internal team

Online application form
Core digital journey

Credit bureau API
Removes manual work

SHOULD HAVE

SMS/Email notifications
Better communication

Application tracker
Shows status to user

COULD HAVE

Mobile app
Future phase

WONT HAVE

Blockchain verification
Low ROI now
